

Farnham Geological Society

Next meeting on Zoom only

Friday 13th December 2024 - 7:30pm for 8pm

The History of Oil and Gas Exploration - West of Shetland.

Nick Schofield - Aberdeen University

Nick Schofield is a Professor of Igneous and Petroleum Geology. He specializes in the seismic and field interpretation of intrusive and extrusive sequences in volcanic terranes and their interaction with hydrocarbon systems.

He is a multi-award winning scientist at the forefront of aiding industry in understanding challenging volcanic geology in the subsurface globally.

External roles include sitting on the IODP (Integrated Ocean Drilling Program) Science Evaluation Panel and the UK-IODP program advisory group (PAG)
